Re: Non-reader Contact Cards  
From: Literacy Volunteers of Glens Falls

Our affiliate wishes to express our appreciation for your most unique design of a product, that was desperately needed in this particular area.

Not only does the card carry the very basic information of what we do (which can quickly be read by a nurse or public health worker), but your sense of whimsy on the front cover, has intrigued many of our students as well as agencies.

I thought you might be interested to know that these cards are now being regularly stocked by tutors in various positions of leadership and training, all public health nursing bags for home visits, and at over 20 agencies in Warren and Washington counties. As you can see, what began as a very simple idea, now has far reaching impact throughout our area.

Thanks again for this valuable addition to our program, and we are so glad that we followed through on that original lead, that brought us to the Alexander Agency. We look forward to working with you on another project.

Sincerely,

Mary Ann Schweikert - Executive Director
